SUMMARY

Senior Software Engineer with 4.5+ years of experience specializing in Flutter, cross-platform architecture, and production mobile applications. Lead a team of 3 engineers, delivering AI-powered healthcare and enterprise solutions across Android, iOS, and Web. Cut a core clinical workflow's completion time by 53%, reduced cloud infrastructure costs by over 90%, and shipped apps with 20,000+ downloads.

EXPERIENCE

Senior Software Engineer | Lektik Consulting

September 2023 - Present, Infopark, Kakkanad, Kerala

- Lead a team of 3 engineers, driving architecture decisions, code reviews, CI/CD, testing, and end-to-end delivery of Flutter, React, and FastAPI applications, including App Store and Play Store releases and post-release monitoring.
- CascadeMD | AI Healthcare: Architected a cross-platform clinical documentation platform processing 15,000+ documents monthly for a U.S. government healthcare service. Implemented role-based access, secure clinical workflows, and external healthcare integrations supporting SOC 2 compliance.
- Performance Optimization: Reduced a core clinical workflow's completion time by 53% (49s to 23s) through state management improvements, API optimization, and cross-platform performance enhancements.
- Sprinkle | Sports Platform: Developed a Flutter application using Clean Architecture, with 20,000+ downloads and 15,000+ active users. Designed a backend-driven architecture that eliminated frontend code changes when adding new sports, replacing updates across 5-6 files with backend configuration. Integrated authentication, payments, and deep linking.
- Narraited | AI Biography: Built a cross-platform application serving 1,000+ active users, integrating speech recognition, audio recording, and social sign-in. Reduced Azure hosting costs by 90%+ ($940 to under $100/month) by right-sizing resources and removing unused services.
- Seequince | Workforce Management: Developed GPS geofencing and background location tracking capabilities, improving core workflow completion time by 20% through codebase refactoring.

Flutter Developer | Reubro International

April 2022 - August 2023, Kochi, Kerala

- Delivered 5+ Flutter applications across Android, iOS, and Web, including e-commerce, social networking, job search, and employee management platforms. The employee management app used GetX MVVM with role-based access and payroll workflows.
- Mentored 4 junior developers in Flutter, Kotlin, and Firebase to support production feature delivery.
- Set up CI/CD pipelines with GitHub Actions to improve release efficiency, and handled performance optimization, crash monitoring, and maintenance of legacy Java/Kotlin Android apps.
- Ashadhara | Government Healthcare: Developed a secure Kotlin application implementing SSL pinning, root detection, code obfuscation, and screenshot restrictions, designed for users with Haemophilia disease.
- Built a subscription-based academy management platform with enrollment, attendance, and scheduling features, integrating Stripe, Apple In-App Purchase, and Google Play Billing.

EDUCATION

Master of Computer Applications | Indira Gandhi National Open University

Delhi, 2026

Bachelor of Technology in Mechanical Engineering | Universal Engineering College

Vallivattom, Kerala, 2016

SKILLS

- **Mobile Development:** Flutter, Dart, Android, Kotlin, Java, BLoC, Riverpod, Provider, GetX, Jetpack Compose
- **Backend & Web:** Python, FastAPI, React, REST APIs, GraphQL, WebSockets, PostgreSQL, Firebase
- **Cloud & DevOps:** AWS (ECS Fargate, ECR, RDS), Azure, Docker, GitHub Actions, Codemagic, CI/CD
- **Architecture & Security:** Clean Architecture, MVVM, OAuth, JWT, SSL Pinning, Role-Based Access Control, Performance Optimization
- **AI Integration:** OpenAI, Gemini, LLM Integration, Prompt Engineering
