SUMMARY

Experienced Senior Software Engineer with 5+ years of hands-on experience in developing and maintaining cross-platform applications using Flutter for Android, iOS, and web. Delivered production-ready apps across various domains, including social media, e-commerce, job search, and AI-based platforms. Skilled in integrating RESTful APIs and Firebase services, implementing scalable state management (BLoC, Provider), and setting up CI/CD pipelines using GitHub Actions. Proven track record of reducing crash rates, improving development workflows, and delivering projects ahead of schedule. Adept at mentoring junior developers, conducting code reviews, and collaborating in Agile teams to align technical solutions with business goals.

EXPERIENCE

Senior Software Engineer | **Lektik Consulting**

September 2023 - Present, Infopark, Kakkanad, Kerala

- Developed and maintained Flutter applications for Android, iOS, and Web, with a strong focus on healthcare, AI-powered documentation, and enterprise workflow platforms.
- Built and enhanced production features involving speech recognition, AI-generated clinical documentation, REST API integrations, Firebase services, AppsFlyer, payment flows, and cloud-based infrastructure.
- Implemented scalable app architecture using BLoC and Provider, established CI/CD workflows with GitHub Actions, and mentored junior developers through code reviews, technical guidance, and Agile collaboration.

Flutter Developer | **Reubro International**

January 2022 - August 2023, Kochi, Kerala

- Developed and delivered Flutter applications for social media, dating, e-commerce, job search, and web platforms across Android, iOS, and Web.
- Integrated REST APIs, Firebase services, BigCommerce, and third-party platforms while setting up CI/CD pipelines using GitHub Actions to improve release efficiency.
- Reduced application crash rates by 30% through performance optimization, crash analytics monitoring, bug fixing, and maintenance of legacy Android applications built with Java and Kotlin.

Flutter Developer | **Instyart Private Limited**

January 2021 - December 2021, Remote

- Developed a business management platform for dance and music academies, supporting student enrollment, attendance tracking, class scheduling, role-based access, and instructor management.
- Integrated payment workflows using Stripe, Apple In-App Purchase, and Google Play Billing, enabling subscriptions and multiple payment methods.
- Implemented notifications, reminders, and analytics-driven reporting to improve engagement and provide insights into revenue, attendance, and student activity.

PROJECT

CascadeMD | **Lektik Consulting**

dictate.cascade.md, November 2025 - Present

- Architected and delivered an AI-powered clinical documentation platform that converts dictated patient encounters into structured data through simple dictation sections for submitting to a United States government service.
- Implemented secure healthcare workflows with speech recognition, AI-assisted documentation, role-based access, and reliable submission of patient records to external healthcare systems.
- Improved usability, performance, and scalability across mobile and web platforms, helping reduce manual documentation effort for clinicians.

Seequince | **Lektik Consulting**

January 2026 - March 2026

- Built and published a field workforce monitoring application for tracking employee attendance, shift activity, and location compliance.
- Implemented GPS geofencing and background location enforcement to support automatic session termination outside designated work boundaries.
- Integrated Firebase push notifications and scheduled background processes to deliver shift updates and continuously monitor location-based activity.

Sprinkle | **Lektik Consulting**

play.google.com/store/apps/details?id=com.lektik.sprinkle, July 2024 - November 2025

- Developed a cross-platform sports gaming betting application using Flutter, clean architecture, and modular state management to support a scalable, high-performance user experience.
- Implemented secure authentication, subscription flows, payment integrations, deep linking, local data persistence, and embedded web content.
- Built location-aware and timezone-sensitive features while improving app reliability through performance monitoring, crash analytics, and production issue resolution.

Narraited (Android/iOS/Web) | Lektik Consulting

app.narraited.com, August 2023 - May 2025

- Built a cross-platform AI-powered biography creation platform that guides users through structured, chapter-based storytelling workflows.
- Integrated speech recognition, audio recording, playback, multimedia support, push notifications, and responsive UI across Android, iOS, and Web.
- Implemented secure authentication and account workflows using Email, Google, and Apple sign-in, supporting a polished publishing experience across app stores and web platforms.

Employee Management Application | Reubro International

October 2022 - September 2023

- Developed an employee and employer management application for attendance tracking, time-off requests, payroll workflows, announcements, and role-based access.
- Implemented clean Flutter architecture using GetX MVVM, separating UI, business logic, and data layers for better maintainability.
- Integrated push notifications, calendar views, and admin/employee-specific workflows to improve usability and operational efficiency.

GreenWealth | Reubro International

April 2023 - August 2023

- Developed a Flutter-based e-commerce application for browsing and purchasing hair care products, integrated with a BigCommerce backend.
- Built reusable product listing, filtering, cart management, checkout, and order flow components.
- Implemented secure authentication and payment gateway integrations to support a smooth purchase experience.

Job Search Application | Reubro International

November 2022 - December 2022

- Developed a job search platform connecting heavy vehicle owners with companies through job listings, filtering, and application tracking features.
- Implemented a clean and responsive Flutter UI using the GetX MVVM pattern for maintainable feature development.
- Integrated location-based services to improve job relevance based on user geography.

Petty | Reubro International

March 2022 - December 2022

- Built a swipe-based dating application with profile browsing, matching, user preference filters, and interactive discovery flows.
- Integrated real-time chat, media sharing, login via email, and third-party service integrations.
- Improved user experience through responsive UI implementation, state management, and feature-level performance optimization.

Ashadhara | Reubro International

October 2021 - December 2021

- Developed a secure Android application in Kotlin for a government health initiative, enabling health-related data collection through a simple questionnaire flow.
- Implemented root detection, SSL pinning, code obfuscation, restricted screenshots, and automatic app closure on compromised devices.
- Designed an accessible questionnaire experience for users with limited digital literacy while meeting strict government security requirements.

Organization Management App | Instyart Private Limited

January 2021 - December 2021

- Built a business management platform for dance and music academies, streamlining student enrollment, attendance, class scheduling, instructor management, and payments.
- Implemented role-based access, secure payment workflows using Stripe, Apple In-App Purchase, and Google Play Billing, including subscription support.
- Delivered analytics, reporting, notifications, and reminder systems to improve visibility into revenue, attendance, student activity, and engagement.

EDUCATION

Master of Computer Applications | Indira Gandhi National Open University

Delhi, 2026

Bachelor of Technology in Mechanical Engineering | Universal Engineering College

Vallivattom, Kerala, 2016

SKILLS

- **Architecture & System Design:** End-to-end system design (UI → API → DB → AI), Agile app development using Jira and Trello.
- **Frontend & UI Development:** React + TailwindCSS, Flutter (Mobile, Web, Desktop), Dart, HTML, CSS, Wix, Android (Jetpack Compose), Multi-step forms & SPA dashboard design, Custom Animations, Rive, Lottie, Responsive Layouts, Design Systems, Figma.
- **Backend & APIs:** Python, FastAPI, REST APIs, GraphQL, WebSockets.
- **Databases:** PostgreSQL database design & integration, AWS RDS (PostgreSQL), Firebase, Local storage (Hive, Shared Preferences, sqflite).
- **Cloud & DevOps:** AWS (ECS Fargate, ECR), Dockerized frontend & backend, Azure Web Apps, Azure Container Registry, Azure App Service, CI/CD (GitHub Actions, Codemagic), Git, GitLab, GitHub, GitHub Pages.

- **AI Integration:** Gemini AI (LLM) / OpenAI integration & prompt handling, Running open source models locally.
- **Security & Configuration:** JWT-based user authentication, AWS SSM (Secrets & Environment), OAuth (Google/Apple Sign-In), Secure Storage, SSL Pinning, Root detection and handling, Permissions Handling.
- **Flutter Architecture & Enhancements:** Provider, Riverpod, BLoC, GetX, SetState, App Localization (i18n), Push Notifications (FCM), In-App Purchases / Subscriptions, Deep Linking, App Lifecycle Management, Geocoding, Geofencing, Geolocator.
- **Publishing & Analytics:** Crashlytics, Appsflyer, Firebase App Distribution, TestFlight, Play Store, App Store.
- **Tools & IDEs:** Android Studio, Visual Studio Code, PyCharm, Word, PowerPoint.
